

FOR IMMEDIATE RELEASE

VOICECOM ACQUIRES INUNTIUS – CONVERGED COMPANY TO EXPAND COMMUNICATIONS SOLUTION TO VOIP NETWORKS

ATLANTA, GA - November 28, 2005 - Voicecom Telecommunications, LLC, a portfolio company of private equity firm The Gores Group, LLC ("Gores") and a leading provider of call answering solutions for the business-to-business market, today announced that it has acquired iNuntius, Inc., a leading developer of SIP-based VoIP and Unified Communications solutions. iNuntius will be folded into Atlanta-based Voicecom's existing operations, and its Compton, CA location will integrate with Voicecom's other locations in Atlanta, Dallas, and Reno.

With a pioneering technical background and sole ownership of all its intellectual property, iNuntius and its nine years of research and development into its IP telephony and enhanced messaging platforms will converge with Voicecom's 20-year history of providing turnkey hosted voice solutions, resulting in a provider that offers traditional and next-generation applications across voice and data networks. The acquisition allows Voicecom to continue to provide technology-driven solutions that solve the communications needs of its customers even as they migrate to IP telephony based networks.

"As businesses experience a transitional period during which some of their employees or locations are using TDM and some are using VoIP, it is desirable for the applications and services used to remain constant," said Kevin M. Moran, President and CEO of Voicecom. "Voicecom will bridge maturing and emerging technologies and provide a constant set of value-added applications to any end point regardless of the transport mechanism. And as customers' networks evolve, they will continue to benefit as Voicecom remains ahead of the curve, leveraging the capabilities of VoIP and other emerging technologies."

Having achieved early success in the carrier VoIP market, iNuntius is now positioned to take advantage of Voicecom's seasoned management team and proven track record to enhance its position in the carrier market and quickly enter new retail markets. Kevin Torf, President of iNuntius, will be joining the Voicecom team as Chief Technology Officer, leading technology innovation and development efforts, and have a seat on the Voicecom Board of Directors. Torf is excited about ways in which to leverage the tremendous synergies in the newly combined customer base, "The iNuntius product set includes an immediate solution for Voicecom's strong foothold of CLEC customers as they seek an IP-based local and long distance alternative to the existing UNE-P agreements from the RBOCs which expire in the first quarter of 2006. Additionally, the IP telephony solutions produce an ideal add-on service for Voicecom's multi-location IVR customers and corporate messaging enterprises."

About Voicecom
